(Adopted March 30, 1987)

MSC Mary Archer moved that the agenda be approved as amended. Passed unanimously.

8 Braille Formats Technical CommitteeLynette Taylor

8.1 Report and Board Charges

Report read by Frances Mary D’Andrea and on file.

Re: Charge: Judy Dixon will draft a brief statement clarifying how for cataloging purposes, ISBN numbers are not necessarily the same in the Braille version of a book as they are for the print version of the same book. BANA's recommendation was that the statement be used of “Transcription of ISBN ...” for identification. This rationale would then be provided to the Formats and Literary committees.

Approval was requested to distribute additions to Formats with the Minutes (i.e., dissemination needs to be faster, hopefully utilizing the BANA website and other internet resources. However, BANA will still go through the technical committee review process for all changes. Kim Charlson stated that the Board should review code changes, while at the same time, referrals are made to technical committees for review. Publication and distribution of approved code changes would then go to the BANA Publications Committee for final formatting, distribution and posting on the website.

The following proposed Rules were read and discussed:

Rule 1, Section 13e: Pages numbered with letter/number or number/number combinations. This issue was brought forward by teachers of the visually impaired and Braille readers, who believe the natural location of page numbers is at the right margin with the print page number – not in cell 7, where it could easily be overlooked. The Board concurred that it would be easier to locate under the print page number. A possible suggestion could be to include a transcriber's note stating what format is used, such as “blocked in cell 7”. Committee to be commended for a well-done report which included strong rationales for proposed changes.

Rule 2, Section 2c(5)(c): ISBN numbers, both 10-digit and 13-digit. The brief statement being prepared by Judy Dixon will clarify this issue.

Rule 2, Section 7c(1)(d): Table of Contents: Complex example, confusing stair-step format. The board suggested that headings begin on next page, to keep staircase table format together. Agreed that it is correct to ignore italics and bold.

Rule 2, Section 7c(7): Contents in index format. Issues to be considered include consistency, use of guide dots and right justification. The BANA board suggested wording “align numbers at right margin” instead of “align the numbers to the right of the braille page”; “three or less” rather than “fewer than four” and “four or more numbers” instead of “more than four numbers”. Each book must be consistent. The issue of right justification will be referred to Outreach and Education for further review.

Rule 6, Section 3h: Boxes within boxes. The proposed format for how the boxes are displayed looked very good, but there is a need for the Braille reader to be able to know how the boxes are related. The committee should consider possible options such as a transcriber's note, an arrow to a related box, a word could be inserted for clarification, or the box could be indented.

Rule 8, Section ____ (new): Linear format. The board suggested using “table entry” instead of “term”. This rule will then be ready to go through the review process.

Rule 8, Section 10 (which will become Section 11): Listed tables. This rule reads well, but would request that the committee address the issue of runovers.

Rule 8, Section 10 (proposed): Skeleton Tables

The board felt that cause and effect columns need to show actual lines with numbers, especially for younger readers. Questions raised by the board: 1) What are we trying to fix in this case? 2) the example was Out of context ... 3) should use a clear example to illustrate this situation.

Rule 13, Section 8g, (Proposed): Pictures used as exercises. The board recognized this as a good idea, but cautions transcribers about naming pictures in a testing situation without publisher input. Guidance should be given to use this option only when appropriate, or recommend the use of “ask”, and do not give the word which is the answer. A teacher’s note should list transcriber notes, any associated tactile graphics, etc.

Meeting adjourned at 5:00 PM, Thursday, November 3, 2005.

Meeting resumed at 9:00 AM, Friday, November 4, 2005.

There were no observers present.

Braille Formats Technical Committee, continued:

Betsy Burnham brought up the need for guidelines for leaving blanks in consumables such as worksheets or other exercises accompanying textbooks. This was discussed further during the Early Literacy Committee Report.

MSC Jennifer Dunnam moved that Jean Simpson and Dena Garrett be reappointed as consultants for a term of one year. Passed unanimously.

MSC Darleen Bogart moved that Susan Christensen and Sandy Smith be reappointed as members for a term of two years. Passed unanimously.

MSC Warren Figueiredo moved that Diane Spence be added to the Braille Formats listserv until their work with Rule 13 is complete. E-mail vote ending 08-10-05. Passed unanimously.

9 Computer Braille Technical Committee Betty Teachman

9.1 Report and Board Charges

Report read and on file.

There was some discussion about whether code changes should be under the Computer Braille Code or a part of Formats, as these elements are needed in both codes. A possible Suggestion would be to insert "See: Computer Code" or "See: Formats".

MSC Carol Morrison moved that the final draft of the spreadsheets rule be prepared for the technical committee review process, including the exact reference of where it will be inserted, and in context, using specific language and numbering. Passed unanimously.

MSC Eileen Curran moved that the wording for Special Symbols be finalized and circulated for technical committee review as outlined in BANA Policies. Upon completion of review process, this rule will be published on the website. Passed unanimously.

This will be a code change, so there will be a press release issued when it is released.

MSC Mary Archer moved that Joe Sullivan and John Jackson be reappointed for a term of two years. Passed unanimously.

10 Ad Hoc Committee on Early Literacy Materials Production.....Betsy Burnham

10.1 Report and Board Charges

Report read and on file.

Charge #6, to look at the preparation of materials for very young children (beyond just page size, etc.) [transferred from Braille Formats committee] missing from the last meeting list and ongoing, should be added to the master list of committee charges.

New assignments requested:

There was some discussion of special symbols for representing colored words, etc., which present problems for transcribers. Some possible solutions discussed were a physical underlining method, with possible attached color identifier. This method creates an extra line, but doesn't interrupt word flow while giving information, while being non-intrusive. This could be used instead of dots 4,6, for which younger students don't always know or understand the meaning. "Physical underlining" is also useful for locating specific resources, could be used from 1st grade on, and can be computerized. how could transcribers show the type of emphasis, such as green, bold, italics, underlined, etc.? Underscore with identifier at end, at beginning, in 2nd cell, etc.?

Betsy Burnham stated, "Inappropriate underscore is preferable to inappropriate intrusive symbols". The board agreed that emphasis indicators needs additional study and research. BANA approval was requested to rearrange the committee by changing and reducing the number of committee members. Betsy Burnham will submit a revised list for consideration.

MSC Betsy Burnham moved that the Early Literacy Materials Production Committee be charged with developing guidelines for transcription of consumable materials and other forms that require direct entry on the Braille page. Passed unanimously.

MSC Frances Mary D'Andrea moved to charge the Early Literacy Materials Production Committee to work with BANA's Braille Research Committee to help formulate research questions related to emphasis, and to help the Research Committee with preparation of examples. Passed unanimously.

Diane Wormsley was appointed as the new liaison to the ELMP Committee.

11 Ad Hoc Foreign Language CommitteeAnn Kelt

11.1 Report and Board Charges

Report read and on file.

Mary Archer announced that NBA has scanned the old document files and converted them to PDF files. Joanna Venneri is assuming responsibility for the coordination, preparation of examples and completion of the document to be forwarded to the publications committee for

distribution to the board and the technical committees prior to final adoption. She will work closely with Ann Kelt. Joanna will also work with Warren Figueiredo to search for fonts, especially the Unicode font. It is hoped that this document will be completed by the Spring meeting.

[The Music Committee Report, Item #15, was inserted into the Agenda here, to fit into the time slot preceding the NFB Technology Center Tour.]

Observer at Friday afternoon meeting: Chancey Fleet

12 Literary Technical CommitteeMartha Pamperin

12.1 Report and Board Charges

Report read and on file.

There was discussion about the need for a wider source of reader feedback, such as focus groups. Diane Wormsley will connect with Research Committee for possible strategies for connecting with more Braille readers -- library databases, periodicals etc.

MSC Darleen Bogart moved to approve the Joint Statement of the Literary and Formats Committees with the following modifications and clarifications: 1) In Braille Formats specifications, clarify the intent of the altered order portion of the statement; 2) Change the production statement from Braille Formats specifically to more general consideration; 3) Add Braille to both, and in English Braille American Edition add “dot order”. Passed unanimously.

Discussion continued regarding 2005 Rulings. Some issues that were agreed upon were:

It should not be necessary to have to rely on the transcriber’s ability to interpret meaning in cases such as recognizing strings of Roman numerals.

Writing rules that can be managed by a computer and Braille translation software are not the primary factor, but are a consideration, when trying to minimize reliance on the transcriber’s interpretation.

If necessary, it may be necessary to change long-standing rules; but most unusual print practices can be transcribed by following print.

The dot appearing in some current phone numbers is neither a period nor a decimal – it’s a dot.

It is important to let the Braille reader know exactly what is written in the print text, as long as it doesn’t compromise readability or conflict with current code.

Literary Committee discussion, continued:

The proposed list of symbols needs to be submitted in final format for the approval process, including examples which should have input from the Braille Formats committee. The 2-cell slash will be OK, as will copyright, trademark and registered trademark.

The view on the letter sign is that it is necessary when a letter might be interpreted as a contraction or pronunciation is confusing, but it should not be used before S in plural numbers. Spatial emphasis needs more research, especially with regard to linear Braille displays.

MSC Darleen Bogart moved to reappoint John Wilkinson for a term of 2 years and consultant Tom Keith for a term of 1 year. Passed unanimously.

13 The Special Presentation of the NFB Technology Center Tour was held on Friday afternoon, and included demonstrations of the new Kurzweil handheld scanner, many embossers, Braille note-takers, and refreshable Braille displays.

E-mail vote to end on 09-20-05. Passed unanimously.

MSC Pam Boss moved that BANA begin adding “effective” dates to announced changes, revisions and code additions. This would apply to all NEW transcriptions. Wording should be distributed to the Board for review for 90 days in February or March – to be able to release in July, effective Jan. 1st of the following year.
